New Product

Mybility City 4x4 Wheelchair

Redesigned 4 Wheel Drive Urban Wheelchair

Mybility is proud to announce its newly re-designed City Model 4x4 Wheelchair. Perfect for busy urban living.

Mybility City Wheelchair user Michelle, finds its very neat compact shape and size makes it perfect for nipping around tight spaces indoors and out. It is also excellent for tackling street and pavement obstacles. Michelle likes to go shopping in local markets and finds that the wheelchair is safe and comfortable over cobbles, uneven surfaces and to get up and down kerbs. She is especially impressed at how it nips in and out of cluttered isles in the local shops and also manoeuvres very tight corners at home. Even more impressively it can be used as a seat in vehicle providing the correct ties are used.

The Mybility City Wheelchair is a class 3 chair and like the rest of the Mybility All Terrain Four X Wheelchair range, it is road and pavement legal with a long range of 25 miles. It is capable of handling all terrains inside and outside including: **Grass, Mud, Sand, High Kerbs, Steep Slopes, Steps, Cobbles and even Snow.** It is also kind to carpets and floors at home.

Suitable for Kids Aged from 5 Years to Elderly Adults. Fully crash tested to EU standards for use in a vehicle.
